Summary

Software Engineer with 5+ years of experience developing, maintaining and modernizing enterprise systems, mainly for public-sector tax administration. Full stack work with Java, Spring Boot and Angular, including REST APIs, microservices, system integrations and migration of legacy Java EE applications. Experienced with automated testing, relational databases and the full software development lifecycle in remote teams.

Professional Experience

Accenture do Brasil **September 2025 - September 2026**

Senior Systems Analyst

- Led the adaptation of systems and business rules to Brazil's new alphanumeric CNPJ (national business registry ID) format, preparing validations, integrations and dependent applications for the new Federal Revenue Service standard.
- Implemented back-end and front-end changes with Java, Spring Boot and Angular, and adapted REST APIs to the new format while preserving compatibility with consuming systems.
- Used AI tools to map required code changes and analyze impact, making technical analysis faster and more thorough.
- Created automated tests for the new format scenarios, reducing the risk of regressions.
- Worked with asynchronous messaging (Apache Kafka and RabbitMQ) and Docker, in an environment running Kubernetes and Microsoft Azure.

SEFAZ-PE (Pernambuco State Department of Finance) **November 2022 - December 2025**

Software Developer

- Migrated PRT, a digital protocol (document intake and tracking) system, from Java EE to a microservices architecture with Spring Boot and Angular, built on open-source technologies.
- Maintained and evolved PRT's integrations with multiple department systems.
- Optimized queries and data access, improving system performance.
- The new architecture enabled independent deployments, application monitoring and simpler maintenance.
- Maintained legacy Java EE applications built with EJB, JSF, PrimeFaces and JSP.
- Wrote automated tests with JUnit and Mockito and took part in code reviews and continuous integration.
- Resolved incidents and worked with business, architecture and infrastructure teams to define solutions.

FADESP/SEFA-PA (Pará State Department of Finance) **July 2021 - February 2023**

Software Development Analyst

- Built Consulta Contencioso from scratch, a SEFA-PA web application for looking up tax litigation cases, using Java, Spring Boot and Angular.
- Reverse-engineered an undocumented legacy VB6 system to extract business rules and carry them into the new application.
- Optimized SQL and PL/SQL queries on Oracle and implemented file and data conversion from the legacy system.
- Developed and maintained internal systems and electronic tax document applications, with persistence through JPA and Hibernate.
- Wrote unit tests with JUnit and Mockito and worked on CI pipelines with Maven, GitLab and Jenkins.
- Progressed from trainee to mid-level developer.

Technical Skills

- **Back-end:** Java (8, 11, 17 and 21), Java EE (EJB, JSF, PrimeFaces and JSP), Spring Boot, Spring Data, REST APIs, microservices, WebFlux and reactive programming.
- **Front-end:** Angular, TypeScript, JavaScript, HTML and CSS.
- **Architecture and integration:** DDD, SOLID, messaging, asynchronous and event-driven processing, Kafka, RabbitMQ, JMS, caching and Redis.
- **Security:** authentication, authorization, Spring Security, JWT and access control.
- **Databases:** Oracle, DB2, PostgreSQL, MySQL, MongoDB and PL/SQL.
- **Quality and observability:** JUnit, Mockito, automated testing, code review, logging, monitoring, log analysis and application troubleshooting.
- **Tools and delivery:** Git, Maven, Docker, Kubernetes, Jenkins, GitLab CI/CD, SonarQube and Microsoft Azure.

Education

Faculdade Focus **April 2025 - August 2025**

Web Development

Postgraduate Specialization (Lato Sensu)

Faculdade Focus **February 2024 - July 2024**

Software Engineering

Postgraduate Specialization (Lato Sensu)

IESAM **August 2014 - December 2019**

Computer Engineering

Bachelor's Degree

Additional Courses

- Microservices Specialization (AlgaWorks, 2026)
- Docker Immersion (AlgaWorks, 2025)
- Design Patterns with Java (AlgaWorks, 2024)
- Java Specialist (AlgaWorks, 2023)
- Reactive Programming with Spring WebFlux (Udemy, 2023)
- Apache Kafka (Udemy, 2023)
- RabbitMQ in Practice (Udemy, 2023)
- JPA Specialist (AlgaWorks, 2022)
- Essential TDD (AlgaWorks, 2022)
- Unit Testing with JUnit (AlgaWorks, 2021)
- Spring REST Specialist (AlgaWorks, 2021)
